Final Project — Progress Report 1

Planning, Visual Design & Responsive Wireframing

REVAMP

Upcycled & Reworked Clothing Store

Tagline: *Old Pieces. New Identity.*

Course: E-Commerce

Section: TW391

Instructor: Prof. Mar Eli Sagsagat

Group Members

- Juan Carlos Cruz
- Amancio Jed Unay
- Aaron Castro

Date: 26/09/2026

2. PROJECT PLAN

2.1 Project Title

REVAMP — Upcycled & Reworked Clothing Store

REVAMP is an online clothing store specializing in recycled, upcycled, and reworked clothing. The name "REVAMP" represents the process of taking existing or old garments and giving them a new appearance, purpose, and identity.

Tagline: *Old Pieces. New Identity.*

2.2 Project Description

REVAMP is an e-commerce clothing website that sells unique garments created from recycled, upcycled, and reworked clothing. Instead of discarding old or unused garments, REVAMP gives them a new identity by redesigning, reconstructing, and modifying them into wearable fashion pieces.

The website is designed for customers who are interested in streetwear, vintage clothing, thrift fashion, and unique pieces. Unlike conventional clothing stores that mainly offer mass-produced products, REVAMP focuses on limited and one-of-one garments. Each product can have its own REVAMP ID and information about how the original garment was transformed.

Project Objectives

- Promote the reuse and upcycling of clothing.
 - Provide customers with unique and reworked fashion pieces.
 - Create an accessible online platform for purchasing revamped clothing.
 - Encourage customers to consider alternatives to conventional fashion consumption.
 - Provide a simple and responsive e-commerce shopping experience.
 - Showcase the transformation process behind each reworked garment.
-

2.3 TARGET USERS / CUSTOMERS

Age Group

The primary target customers are teenagers and young adults approximately **16–30 years old**.

Location

The initial target market is customers in the **Philippines**, with the website designed so that it could potentially support a wider online customer base in the future.

Interests

The target customers may be interested in:

- Streetwear
- Vintage fashion
- Thrift clothing
- Upcycled fashion
- Reworked clothing
- Alternative fashion

- Unique and limited clothing
- Sustainable fashion

Purchasing Behavior

The target customers are likely to:

- Shop for clothing online.
- Use mobile devices when browsing stores.
- Look for unique or limited clothing pieces.
- Compare prices before purchasing.
- Discover clothing through social media and online platforms.
- Prefer clothing with distinctive designs or stories.

Customer Needs

REVAMP aims to provide customers with:

- Unique clothing pieces.
- Affordable reworked fashion.
- Clear product information.
- High-quality product images.
- Easy product browsing.
- Simple shopping cart and checkout processes.
- Information about the materials and transformation of each garment.

2.4 PRODUCTS / SERVICES

REVAMP will primarily sell recycled, upcycled, and reworked clothing.

Product Category	Sample Products
Reworked Tops	Reconstructed T-shirts, graphic tees, cropped shirts
Reworked Bottoms	Reworked jeans, patchwork pants, redesigned shorts
Outerwear	Reworked denim jackets, vintage jackets, oversized jackets
Accessories	Upcycled bags, caps, wallets
One-of-One Pieces	Unique reconstructed garments

One-of-One Concept

One of REVAMP's main product concepts is **One-of-One** clothing.

Some garments will be individually redesigned and will only have one available piece.

Example:

REVAMP #001

Reworked Denim Jacket

Size: Medium

Price: ₱1,850

Availability: 1 of 1

This allows customers to understand that certain REVAMP products are unique and cannot simply be restocked as identical pieces.

REVAMP Process

Product pages may also show the transformation process:

Original Garment → Deconstructed → Reworked → REVAMP Piece

This allows customers to understand how each product was created.

2.5 PROPOSED E-COMMERCE FEATURES

The project will focus on realistic features that can be implemented within the group's available development time.

Main Features

- Home Page
- Shop / Product Catalog
- Product Categories
- Product Details
- Search
- Product Filtering
- Shopping Cart
- Login / Registration
- Checkout
- Order Confirmation
- Product Reviews
- Responsive Navigation

Product Filtering

Customers will be able to filter products based on:

- Category
- Size
- Price
- Availability
- Newest Products
- One-of-One Products

REVAMP-Specific Features

One-of-One Products

Identifies unique garments with limited availability.

REVAMP ID

Each unique piece can have an identification number such as **RV-001**.

Revamp Process

Shows information about how the original clothing item was transformed.

Material Information

Displays the materials used in creating the product.

Availability

Shows whether an individual item is available or sold out.

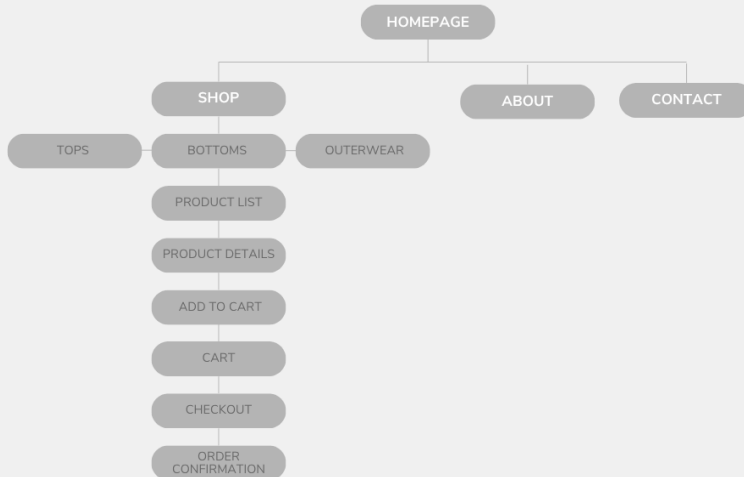

Features Not Included

REVAMP will **not include a wishlist feature**. The project will focus on the core shopping process from browsing products to checkout.

3. WEBSITE STRUCTURE / SITEMAP

REVAMP

Sitemap

4. VISUAL DESIGN / DESIGN DIRECTION

4.1 COLOR PALETTE

REVAMP will use a primarily monochromatic color palette consisting of black, white, and different shades of gray. Cement-inspired tones will be incorporated to create an industrial and raw visual identity.

Color	Hex Code	Purpose
Black	#111111	Navigation, headings, buttons
Dark Gray	#2B2B2B	Secondary sections and UI elements
Cement Gray	#6B6B6B	Accent elements and secondary text
Light Gray	#B8B8B8	Borders, dividers, inactive elements
Off-White	#F2F2F2	Main background
White	#FFFFFF	Product cards and content areas

Design Direction

REVAMP will use a **minimal monochromatic and industrial visual style** inspired by concrete, cement, vintage clothing, and contemporary streetwear.

The website will primarily use black, white, and shades of gray. Cement-inspired tones will be used for backgrounds, sections, borders, and interface elements.

The limited color palette keeps attention on the clothing and product photography while creating a consistent visual identity for the REVAMP brand.

Visual Characteristics

- Monochromatic
 - Minimalist
 - Industrial
 - Cement/concrete-inspired
 - Streetwear-inspired
 - Raw and understated
 - High-contrast imagery
 - Large typography
 - Clean layouts
 - Simple borders and dividers
 - Minimal decorative elements
 - Strong product photography
-

4.2 TYPOGRAPHY

Heading

Space Grotesk Bold

Used for:

- Page titles
- Product names
- Major headings
- Promotional text

Subheading

Space Grotesk Medium

Used for:

- Section titles
- Product categories

- Supporting headings

Body

Inter Regular

Used for:

- Product descriptions
- Navigation
- General information
- Form labels

Buttons

Inter Semi-Bold

Used for:

- Add to Cart
- Shop Now
- Checkout
- Place Order
- Navigation actions

The typography will focus on clean, modern, and readable text that complements the industrial visual style.

4.3 VISUAL REFERENCES / INSPIRATION

REVAMP's visual direction is inspired by contemporary streetwear and clothing e-commerce websites, particularly **MFC KIDS®** and **Concrete Clothing**.

MFC KIDS®

Website: <https://mfcknkids.ph>

MFC KIDS® is used as a reference for its streetwear-oriented e-commerce structure, product presentation, and category-based navigation. Its current website organizes clothing into categories including tees, tops, hoodies, bottoms, shorts, denim, footwear, accessories, and other collections.

REVAMP will use a similar idea of clear product organization but adapt the categories to its own concept:

- Tops
- Bottoms
- Outerwear
- Accessories
- One-of-One

REVAMP will not copy MFC KIDS®'s branding, graphics, product designs, or exact layouts.

Concrete Clothing

Website: <https://concreteclothing.co>

Concrete Clothing is used as a reference for its product-focused clothing store presentation. Its current website places strong emphasis on product imagery, product names, pricing, and a straightforward shopping experience.

The restrained presentation is relevant to REVAMP's planned monochromatic and cement-inspired design. REVAMP will use this type of visual simplicity while developing its own brand identity and interface.

REVAMP's Own Design Direction

The final REVAMP design will combine:

- Streetwear-inspired product presentation
- Minimal e-commerce layouts
- Black, white, and gray colors
- Cement/concrete-inspired tones
- Large product imagery
- Industrial visual elements
- Clean typography
- Simple product cards
- Strong spacing and grid layouts
- One-of-One product presentation

The references will be used for design inspiration only. The final website will use original layouts, branding, content, and design decisions.

5. RESPONSIVE WIREFRAMES

Purpose of the Wireframes

The wireframes represent the **planned design and structure of the REVAMP website** before development.

They are not intended to be fully functional website screenshots at this stage.

The wireframes will demonstrate:

- Page structure
- Navigation
- Product placement
- Buttons and controls
- Content hierarchy
- Product cards
- Desktop layout
- Mobile layout
- Responsive behavior

The final wireframes will be created using **Figma, Canva, PowerPoint, or another appropriate design tool.**

Desktop

Recommended width: 1440px

The desktop design will use:

- Horizontal navigation
- Large product imagery
- Multiple product columns
- Wider spacing
- Large hero sections
- Side-by-side product details
- Expanded checkout layout

Mobile

Recommended width: 390px

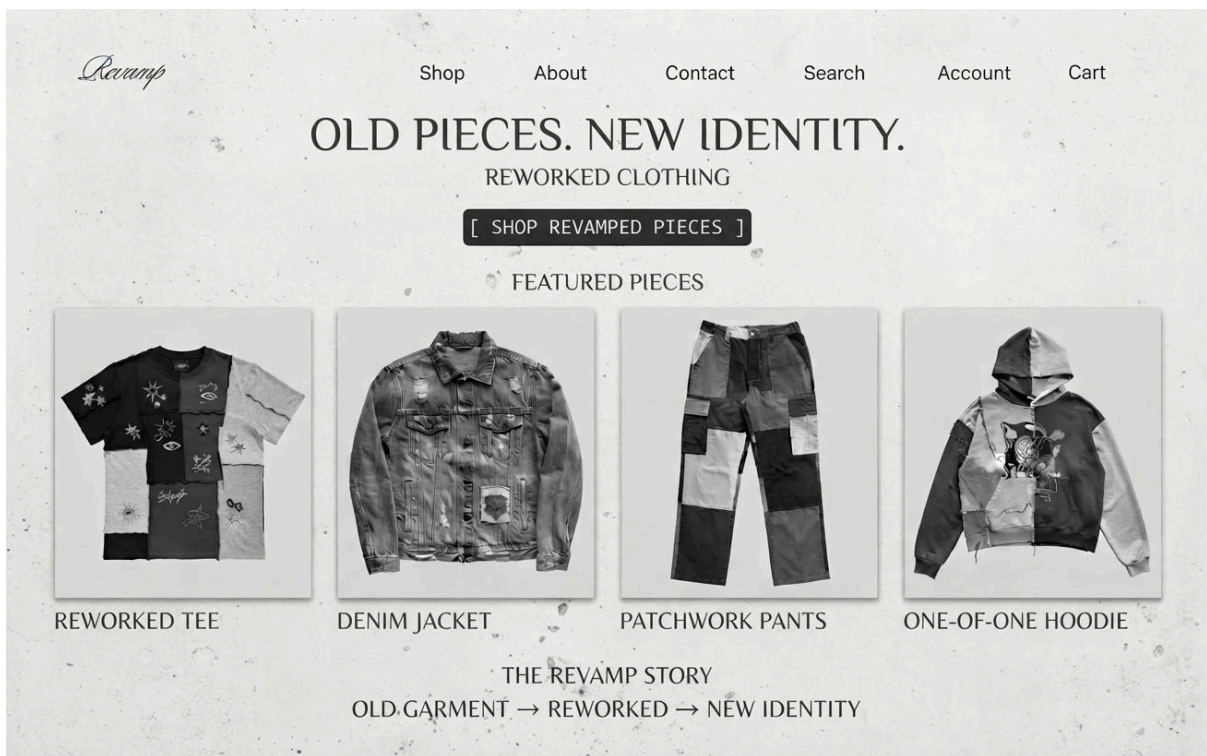

The mobile design will use:

- Hamburger menu
- Two-column product grid
- Smaller product images
- Stacked product details
- Full-width buttons

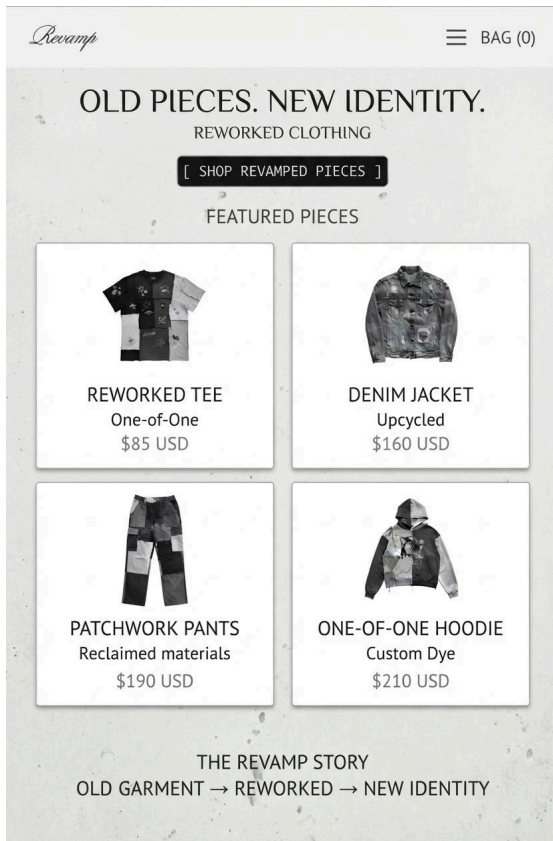

- Touch-friendly controls
- Simplified navigation
- Reduced spacing

6. USER FLOW

OPEN WEBSITE → HOME PAGE → SHOP / STORE → BROWSE / FILTER PRODUCTS
→ SELECT PRODUCT → PRODUCT DETAILS → ADD TO CART → CART → CHECKOUT
→ ENTER SHIPPING DETAILS → SELECT PAYMENT METHOD → PLACE ORDER →
ORDER CONFIRMATION

User Flow Explanation

1. Open Website

The customer visits the REVAMP website.

2. Home Page

The customer sees the REVAMP brand, featured products, and the concept of reworked clothing.

3. Shop / Store

The customer enters the product catalog and browses available products.

4. Browse / Filter Products

The customer can browse categories or use filters to find products based on their preferences.

5. Select Product

The customer selects a clothing item.

6. Product Details

The customer views the product images, price, size, availability, materials, REVAMP ID, and revamp process.

7. Add to Cart

The customer selects their size and adds the product to their shopping cart.

8. Cart

The customer reviews their selected products and checks the subtotal.

9. Checkout

The customer enters their contact and shipping information.

10. Payment

The customer selects an available payment method.

11. Place Order

The customer confirms their order.

12. Order Confirmation

The website displays the customer's order confirmation and order details.

7. MEMBER CONTRIBUTION

Member	Role	Responsibilities
Juan Carlos Cruz	Project Leader	Project planning, documentation, coordination, final report
Amancio Jed Unay	UI/UX Designer	Wireframes, visual design, color palette, typography
Juan Carlos Cruz	Front-End Developer	Website structure, HTML/CSS planning, responsive layout
Aaron Castro	E-Commerce / Content Developer	Product information, categories, e-commerce features, user flow
